

BUSINESS CASE

“Activity Factory for the management of ISO processes”

Target Stakeholders

Quality managers, Operation directors
Manufacturing heads

Pain Points

- Changes to the documents, policies and procedures require approval from many stakeholders.

Industry Characteristics

- Manufacturing companies go for ISO certifications.
- Management of ISO documentation is tedious to keep up with and demands a lot of man-hours to track.

The Solution

Approved documents are stored in Archive One and published to a distribution hub (Archive One Document Hub). Authoring and Approval of procedures and policies can be managed through Activity Factory.

Authoring procedure is automated and tracked, results are distributed to the workforce.
